Dear Tom

Congratulations on achieving national Firewise USA® recognition status in 2017! It is with great pleasure that we welcome Douglass Ranch Property Owners Association to the growing number of communities actively working to reduce their wildfire risks. You'll soon start receiving our monthly electronic Fire Break newsletter.

You'll receive two Firewise USA street signs constructed for outdoor use, for placement in high visibility locations in your community to promote your wildfire mitigation efforts to all residents. The signs will be shipped via UPS.

To access your community's file in the national database and to enter your annual renewal information visit portal.firewise.org.

Your community has access to numerous free materials, with shipping included, that can be used in your educational outreach activities and mitigation events. These can be ordered through our [online catalog](#).

The [Firewise website](#) is full of information and [online trainings](#). We'll keep you updated on our [virtual workshop series](#) and other opportunities to share with residents. Everything we provide can be included in your newsletters and outreach efforts. There's also a detailed [User Reference Guide](#) packed with program related information for you and your board's use; the [Firewise Toolkit](#) is an excellent resource too.

Consider liking [Firewise on Facebook](#) and follow us on [Twitter](#) to learn about success stories, new research and other important wildfire topics.

We're here to provide information and assist with any of your programmatic questions. Contact our customer service staff through email at Firewise@nfpa.org or call 720-475-1931 in our Denver office.

We look forward to working with you and learning about your community's risk reduction successes!
